To: Multi-Specialty HealthCare Patients:

During the course of your treatment at Multi-Specialty HealthCare, you may need diagnostic tests to give your treating provider important information about your illness/injury. Subsequently, additional treatment or surgery may be required. We have facilities to provide some of these additional services. You may choose to have these services performed at our centers or anywhere you like.

Please be advised that Dr. Constantine Misoul and Dr. Lawrence Rubin have a beneficial interest or compensation arrangement with Open MRImages, Harford County Ambulatory Surgery Center and Baltimore Work Rehab.

Thank you for choosing Multi-Specialty HealthCare for your medical needs.
